

Right Now

Artificial Intelligence is here, and one cannot escape it; too late!
 It is ubiquitous, fast, and we are not sure where it is going.
 It is unregulated; there are no ethics standards yet.
 It feels like a Force, the 4th Industrial Revolution
 Time is of the essence to control this.
 Could we be doomed?
 Probably not!
 At risk yes

Talk about: What, Why and Where

Talk about What

AI Ethics Grievances
 Establish AI Order before writing Rules
 Gain time to prevent worst outcomes
 Power Equilibrium between regulars, regulators and the regulated
 Military AI Ethics nobody talks about, Geneva Convention update
 Acceptance of AI for good and opportunism, calls for patience.

Talk about Why

To keep AI, the Force, under human control via a global NGO

Begin talking At

Dartmouth II conference, coming soon
